SPECIFICATIONS

Manufactured in 5800mm lengths. Easily cut to required size.

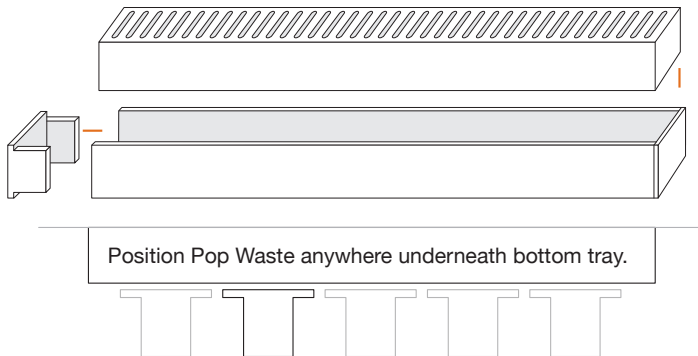

CUTTING & ASSEMBLY INSTRUCTIONS

For easy cutting of Lauxes grates, we recommend using a 100 tooth fine metal blade drop saw, grinder or hacksaw for all cutting procedures.

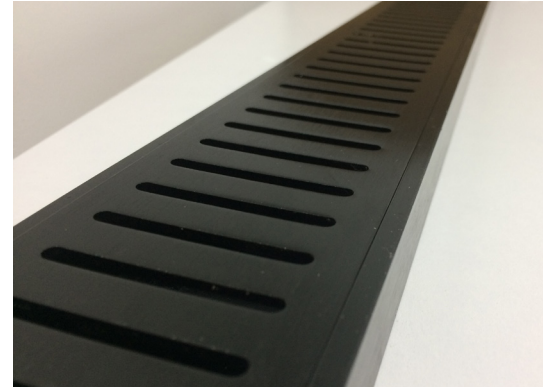

1. Cut the bottom tray 2mm shorter than desired length to allow end caps to be fitted.
2. Cut the top grate 5mm shorter than the bottom tray to allow for easy roll in of top grate and tidy fit.
3. Using a 40mm or 50mm bimetal hole saw, drill out drainage hole in the bottom tray only, at the required position depending on the location of the waste pipe.
4. Insert the end caps into the bottom tray and secure with a bead of silicone on the inside of the tray.
5. Place silicone around the lip of the pop waste and secure to the drilled hole on the underside of the bottom tray.

Installation to be by a licensed plumber and in accordance with AS/NZS 3500.2.
