

Waterstop Doorline

Product information and how to order

To improve the appearance of the entry to the wet area, Gleda has released Waterstop Doorline, a door sill extrusion like no other.

In applications where the floor is bedded or screeded, Waterstop Doorline allows a consistent, cohesive look to be maintained throughout the bathroom.

The result really is spectacular.

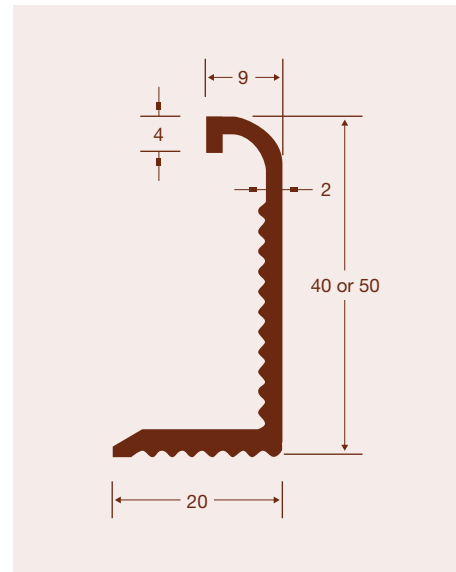

THE KEY FEATURES ARE:

- Bull nose design to create a modern, stylish appearance.
- Safe radius to step over.
- Aesthetically matches Waterstop Streamline showers.
- Serrated surface of the internal vertical leg allows waterproofing membranes to securely adhere to the extrusion, providing enhanced waterproofing.
- 20mm horizontal leg with serrated base provides an appropriate surface area to securely glue the extrusion to the substrate.
- External face of vertical leg is covered with protective tape which enables the extrusion to remain clean and undamaged during construction.
- Bright Silver anodised finish.

Doorline is available in heights of 40mm and 50mm in either one metre or three metre lengths.

These standard lengths can be easily trimmed on site with a hacksaw.

Supplied in packs of six.

PRODUCT CODE	DESCRIPTION
