

# Waterstop Streamline Care Instructions

---

## YOUR WATERSTOP STREAMLINE SHOWER HOB

**Your Waterstop Streamline hob is designed with innovative features to ensure leak-free performance whilst providing a modern, aesthetically pleasing look.**

Most shower installations attempt to seal the screen to the tiles with a bead of silicone. However, grout is porous and can allow water to seep down under the tiles. From here, it can wick its way underneath the tiles and above the water-proofing membrane to escape the shower enclosure.

Waterstop Streamline prevents this by sealing the screen directly to the membrane, effectively trapping the water within the shower enclosure. Streamline not only complies with, but exceeds the Australian Standards for waterproofing (AS3740).

You can be confident in the knowledge that your builder has used the very best method of shower construction available in the industry today.

### **CARING FOR YOUR WATERSTOP STREAMLINE SHOWER HOB**

Your Streamline hob is coated with a high-temperature baked, polymer finish which protects the alloy from the harmful effects of minerals such as calcium and lime in the water.

These finishes are highly resistant to staining, and generally a mild detergent applied with a soft cloth is all it will take to keep your Streamline hob in top condition. If using spray and wipe type products, please follow the directions and wipe off straight away with a damp cloth.

Aggressive cleaning methods are not necessary and can cause permanent damage to the coating and void the warranty\*.

Do not use abrasive cleaners such as Ajax powder, Jiff or Gumption as the abrasive particles can damage the coating. Similarly, avoid using strong solvents, acids or alkaline solutions such as Methylated Spirits, Acetone, CLR or any cleaning product which is not recommended for use on painted or coated surfaces. Finally, do not use abrasive materials such as Scotchbrite or steel wool.

Following these guidelines will ensure that your Streamline hob will provide many years of trouble-free performance.

\*Waterstop Streamline is warranted against manufacturing faults for a period of 7 years. Damage caused by incorrect installation or mis-use is not covered.
